

Manchester Street Name Changes

This listing is copied from a booklet which was originally included with a Geographia "Plans of Manchester" street atlas. The date of the original atlas, and hence of the listing, is not known. Neither is the original atlas available.

The listing was originally (and somewhat unhelpfully) arranged in order of the new street names with the original names set against them. The information has been rearranged into the order of old street names.

The listing provides the postal district for each street (some span more than one) and this may be cautiously taken as equivalent to the number following the 'M' in today's postcodes.

There is also a reference to the page and location on the page of the street in question. This has been included here in case anyone can identify the original publication. If so, we would like to hear from you.

Some streets are annotated with an asterisk (*). This means that the street is a small one and was not named in the original guide.

A number of abbreviations are used. There was no key, possibly this was in the original street guide. Most are reasonably obvious:

Che. - Cheadle

Gat. - Gatley

Wyt. - Wythenshawe

Some new names are annotated "Extn." which is taken to mean that the old street became an extension of the new street.

The booklet was kindly supplied by Roger Simpson, to whom the society's thanks are extended. Conversion to online format was undertaken by John Marsden.
